High Density Mobile  
Systems by

**DIRECTLINE**  
CORPORATION

# SPACE SAVINGS are Only the *Beginning!*

Double your filing capacity.  
Or, free up to 50% of your existing  
floor space for other uses... work  
stations... a conference center...  
mail room, etc.

By mounting shelving units on  
movable carriages that roll on  
tracks, SpacePro eliminates the  
need for aisles. You can utilize  
your existing shelving or filing  
cabinets with the SpacePro system  
or select from a wide range of  
storage options.

*High Density Filing Systems*

## High Density, Very High Style

From high end legal offices, medical facilities and financial  
institutions to warehouse operations, SpacePro complements  
the style of your workplace with a virtually endless selection  
of end panels in solid colors, woodgrains and beautiful  
designer patterns.

An ergonomic handle allows effortless movement of an  
entire library.

## Custom Designs, Creative Solutions

Our experienced Sales Team and  
CAD Design department can create a  
custom layout targeting your specific  
needs with a comprehensive quote for  
the mobile system, shelving and  
accessories to suit your business  
application.

# QUALITY ENGINEERING

## sets **SpacePro®** apart!

### Multiple Track Designs

All SpacePro track designs incorporate tongue and groove rail connections to maintain proper rail alignment for smooth and easy carriage movement with minimal effort. From small surface mount track systems to raised level deck systems, SpacePro has the track to suit your needs.

### Solid Foundation

SpacePro deck systems utilize top grade 3/4" tongue and groove plywood providing a level, safe and substantial walking surface ideal for the floor covering of your choice.

### Carriage Design

All carriages come complete with welded cross members that utilize factory installed and tested dual flange wheels housed in lifetime maintenance free bearings.

### Mechanical Assist Drive System

Mechanical assist systems feature full-length drive shafts. By turning the handle, the chain drive transfers power to the drive shaft moving all drive wheels throughout the carriage simultaneously. This prevents racking of carriages. A simple chain tensioning device provides infinite chain adjustment for trouble-free use. Manually moved carriages are also available for smaller systems.

*Unique one-piece welded wheel channels create the industry's strongest carriage framework*

*Mechanical assist handle with push/pull safety pin*

*Track end stop*

# DETAILS *make* the DIFFERENCE

## Ergonomic Handle

SpacePro's own uniquely designed mechanical assist handle affords effortless carriage movement. By grasping and turning one of the three rotating knobs, users can easily move multiple carriages at one time. The die cast aluminum construction and powder coat finish provide a combination of aesthetics and durability suitable for high-end office environments or heavy industrial work settings.

## Safety First

All mechanical assist handles are equipped with a safety locking pin for disabling carriage movement. In addition, carriage mounted bumpers provide the proper spacing for media protection.

## Storage Units

Space Pro carriages are designed to accept virtually every style of shelving and cabinetry, either new or existing.

# AND IN THE END...

*More Space*  
*More Versatility*  
*More Value*

Large or small, **SpacePro** has the solution for your storage requirements.

By installing storage equipment on movable carriages (eliminating wasted aisles), you can double your storage capacity or free up valuable floor space for other facets of your operations.

Consult your authorized **SpacePro** distributor for details.
